EDUCATION

University of California, San Diego

June 2026

B.S. - Mathematics & Computer Science

Relevant Coursework: Advanced Data Structures, Software Engineering, Supervised Machine Learning, Components and Design Techniques for Digital Systems, Introduction to Numerical Analysis, Modern Algebra II

WORK & LEADERSHIP EXPERIENCE

UCSD Associated Students

La Jolla, CA

Campus Wide Senator

April 2025 - Present

- Strategically managed an \$8 million operational budget, implementing rigorous oversight processes and developing targeted funding initiatives that efficiently allocated resources across campus priorities
- Orchestrated management systems for 600+ student organizations, designing streamlined approval processes and resource allocation protocols that enhanced club operations and campus engagement
- Advocated for comprehensive student needs through data driven policy development, collaborating with administration to implement solutions that measurably improved campus experience and services
- Executed critical departmental decisions through structured analysis frameworks, ensuring alignment with strategic objectives while maintaining transparent communication with stakeholders

VEX Robotics

Lake Elsinore, CA

Founder & President

June 2021 - July 2022

- Programmed autonomous object manipulation algorithms in C for the team's robot, serving as lead driver during testing, optimizing system performance through iterative debugging and real time adjustments
- Architected the robot's control systems using object oriented design principles, developed comprehensive technical documentation including UML diagrams, and system architecture specifications
- Pioneered school's first-ever finals appearance in VEX Robotics competition, implementing advanced MatLab simulations for motion planning and mechanical stress analysis that secured 2nd place overall

UCSD Information Desk

La Jolla, CA

Student Administrative Support

September 2024 - Present

- Orchestrated real time resource allocation system for optimizing student workflow efficiency, implementing data driven scheduling algorithms that reduced station transition times by 15%
- Developed and executed escalation protocols for priority customer requests, implementing a structured methodology that ensured 99% on time delivery of complex orders while maintaining quality standards

UCSD Cafe Ventanas

La Jolla, CA

Student Operations Lead

September 2022 - June 2024

- Led and developed a diverse team of 80 staff members, implementing structured performance monitoring systems and conducting regular meetings that fostered effective interdepartmental communication
 - Spearheaded strategic funding initiatives and financial oversight operations, continuously analyzing profit margins and implementing data driven adjustments that optimized store profitability
-

PROJECTS

Huffman Code Decypher | C, Data Structures, Algorithms, Binary Trees

- Architected a high-performance computational pattern recognition system utilizing Huffman tree algorithms in C, implementing optimized binary encoding techniques to achieve sub-linear time complexity for decryption operations while maintaining $O(\log n)$ space efficiency
-

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, MATLAB, C

Libraries & Tools: React, Tailwind CSS, Next.js, Git, Node.js, Firebase, Figma, HTML, CSS

Managerial Skills: Project management, team leadership, workflow optimization, strategic thinking, user centered design, accessibility, quality assurance, version control, data integrity, cross functional collaboration
