

Mohammed Y. Zaid

US Citizen | San Diego, CA | (562) 417-5854 | mdyasinzaidabir@gmail.com | LinkedIn: [mohammed-zaid](#) | Github: [mzaid03](#)

EDUCATION

University of California, San Diego

La Jolla, California

B.S. in Mathematics & Computer Science

Expected Graduation, March 2027

Relevant Coursework: Algorithmic Design and Analysis, Computer Systems Organization, Operating Systems, Software Engineering, Networks and Communications, Digital Architecture, Computation and Hardware Acceleration

EXPERIENCE

Freelance Software Engineer

Lake Elsinore, CA

Self-Employed

April 2025 - Present

- Developed **20** responsive websites via HTML5, CSS3, and JavaScript, for owners to establish an online presence.
- Architected polished brand interfaces using Flexbox, **CSS Grid**, and custom animations, improving usability.
- Implemented responsive navigation, smooth-scroll routing, and menu features for a seamless user experience.
- Collaborated with the client to gather feedback and refine site features based on evolving business needs.

Muslim Tech Collaborative

La Jolla, CA

Member

April 2024 - Present

- Constructed **10+** full-stack apps using **React/Node.js**, applying agile sprints to boost member skills.
- Developed **ML pipelines** with TensorFlow, streamlining preprocessing and training to reach **99%** accuracy.
- Led more than **30** collaborative projects, enforcing **Git/Agile practices** to cut delivery time by **35%**.
- Facilitated **10+** resume workshops, creating ATS-ready templates that improved internship callbacks by **30%**.

PROJECTS

Velix - Messaging App

January 2026 - Present

- Deployed a real-time messaging app using Next.js and Typescript, ensuring connectivity between users.
- Designed a secure Postgres schema with RLS helpers in Supabase, giving access to messages to members.
- Implemented low-latency message delivery, enabling instant synchronization and consistent state across users.
- Integrated GenAI-assisted tooling into development to automate repetitive tasks and reduce manual review.

Tasklee - Task Manager

January 2026 - March 2026

- Achieved **100%** tenant isolation using Next.js, Supabase Anonymous Authentication, and RLS.
- Built a PostgreSQL-backed task system with persistent storage, allowing users to retain data across sessions.
- Developed a responsive UI with TypeScript, improving usability with smooth loading and error handling.
- Shipped real-time metrics, loading/error states, and session reset to improve usability and demos.

IoT Botnet Detection System

August 2025 - September 2025

- Refined scalable ML pipeline via UCI N-BaIoT preprocessing, enabling analysis of **7M+** records.
- Improved dataset solidity by removing **157k+** duplicates and fixing imbalance, boosting fairness by **92%**.
- Reached **99.96%** accuracy through Decision Tree training with tuned depth, reducing errors to only **86**.
- Validated intrusion detection via correlation heatmaps on **205k** test samples, ensuring scalable deployment.

FIFA Rankings & Political Corruption Analysis

March 2025 - June 2025

- Engineered a Python pipeline across **106** countries and **400k+** data points, modeling FIFA trends.
- Automated more than **1M** CPI, press freedom, and GDP transformations, uncovering links to corruption rankings.
- Built **25+** dynamic visualizations and **3 K-Means** clusters, exposing state-sponsored sportswashing.
- Executed large-scale regression analysis on **100+** models, confirming governance's impact on football.

SKILLS

Programming Languages: Python, Java, TypeScript, C++, C, JavaScript, Go, MATLAB

Frameworks/Technologies: React.js, Tailwind CSS, Redis, Prisma, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD Pipelines, Linux, Microservices, Railway

Databases: PostgreSQL, SQL, NoSQL

Development Practices: Agile, SDLC, Debugging & Troubleshooting, Distributed Systems, Operational Excellence

Certifications: HackerRank - Advanced Python developer, Advanced SQL, Advanced Go, Advanced JavaScript
